SOCIAL CREDIT CAUCUS IN CALGARY

William Aberhart of Calgary will be the next premier of Alberta. He was unanimously chosen to that important post by a caucus of both elected and defeated candidates held in the assembly hall of the Prophetic Bible Institute this morning.

When the motion to name Mr. Aberhart the new government leader was proposed by John W. Huggill, K.C. of Calgary, and seconded by Rev. William Morrison, of High River, the members arose to their feet and cheered the new premier designate to the echo.

"There's no doubt about it being unanimous," Mr. Huggill remarked, and the members cheered again. Mr. Aberhart then ascended the platform and announced that he was ready to take over the reins of government within the next few days.

The resolution which named Mr. Aberhart as the premier of the new social credit party also carried with it two important clauses.

The first was to the effect that Mr. Aberhart would have a free hand in the naming of his cabinet.

The second was that all members of the party were pledged to facilitate in any way the vacation of any seats required by the new premier to carry out his appointments.

Appointment of Mr. Aberhart as leader was reached less than fifteen minutes after the caucus got under way. As the members-elect and the defeated candidates entered the convention hall, they were carefully chequered in by Dr. Victor Wright, acting secretary.

The caucus opened with the singing of "O God Our Help in Ages Past," and this was followed by a short prayer.

Without any further preliminaries, Mr. Huggill ascended the platform and moved the resolution which called upon Mr. Aberhart to form and lead the new government.

GOOSEBERRY LAKE BOY'S CAMP-1935

Another Gooseberry Lake Boy's Camp, the eleventh held at this lake, has come to a successful conclusion. We are proud to say that this camp has carried on through good years and bad. In point of numbers this year we had thirty-three boys present, slightly more than were at last camp.

One of the old time leaders was greatly missed this summer. In 1925 he founded the camp and in the succeeding years, with only a few exceptions he piloted the camp ship capably and faithfully. The Camp leaders and boys wish to take this opportunity to thank Rev. J. R. Brown for all he has done to make this camp at Gooseberry Lake what it is. An institution of real summer sport for boys, an institution of spiritual and educational leadership. We wish Mr. Brown success and happiness.

The leaders this year were John Perry, Camp Secretary for ten years, Edgar Wade, Camp Business Manager for three years, Rev. Steele, Director, Rev. Stark, Devotional leader, Ewart Duncan, new-comer to the ranks and Irving Gould. The six

(Continued to back page)

THE CO-OPERATIVE CHALLENGE

The co-operative societies of the world are standing challenge to the financial crisis and the war-bred system of business. They are producing in their own factories for their own known uses every essential commodity. In these industries they are eliminating the vils of the overproduction and underproduction and thus avoiding the greater evil of unemployment. The competition and struggle for profits disappear as co-operation grows. Neighbors become friends and people are drawn together in bonds of sympathy. It is a hopeful sign in this world of crisis that there are enough people who are catching the vision of co-operation to cause the continuous, the constant and the unretarding growth of this movement.

—Dr. J. P. Warbasse.

Questions and Answers

Q Does China devote more land to wheat or rice growing?
A Much more to wheat—47 million acres, as compared with only 39 million used for rice growing.

Q What is the greatest amount of wheat ever produced by any country?
A In 1923 the Russian crop was estimated to be 1,019 million bushels.

Q How much have world shipments of wheat and flour fallen off in recent years?
A From an average of 742 million bushels in 1928-33 and a peak of 927 million in 1929-30 to a total of 523 in 1933-34.

Major Douglas Coming

LONDON, Aug. 28 (C. P.).—Major C. H. Douglas has tentatively arranged to sail for Canada aboard the Aurania, leaving September 14, the Canadian Press learned today.

Under a two-year contract as advisor to the Alberta provincial government, Major Douglas has already expressed his viewpoint that this contract stands despite the overwhelming defeat of the U. F. A administration by the Social Credit League headed by Wm. Aberhart in last week's elections.

He sharply denied reports from Calgary he declined to give a definite reply to an invitation to assist the incoming administration until after the

Mrs. E. C. Pfeiffer and little Maxine left for Calgary Tuesday afternoon where Maxine will receive medical treatment.

Miss Marjorie Tompkins left Thursday to be ready to start teaching at St. Elmo School near Hem-aruka next week.

Miss Estella McKinnou has accepted an appointment as teacher under the Naco School Board.

Aberhart caucus this afternoon.

"The party caucus," he told the Canadian Press today, "does not affect my position at all. I am a servant of the Alberta government not of any particular party, and I am really to advise when requested."

REDUCTION IN GRAIN STORAGE RATE In Alberta Pool Elevators

Announcement is made that a storage rate of 1-45 of a cent a bushel per day will apply on grain stored in all Alberta Pool elevators, effective from August 31' 1935 for the ensuing license year. The Present rate, which has prevailed for many years, is 1-30 of a cent a bushel a day.

The Alberta Pool elevators is making this voluntary reduction as a temporary measure in reducing cost to grain growers during the present recognized emergency in the marketing of grain.

The proposed reduction will affect 435 Pool elevators in this province as well as four terminals operated by the Alberta Pool on the Pacific coast.

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college, ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of denied and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprising development, in fact more so. The world will not stand still; neither will it move backward. Since the beginning of time and the dawn of civilization the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips of practically everybody to-day—Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hires' Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of to-day? They should.

It was in 1890 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$45 a month he took his shop along. In 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was rated a billionaire.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut out crude solid tires and fitted them to buggy wheels. Thus began the great tire industry of to-day.

H. J. Heinz used to grow horse-radish in his garden and peddle it from door to door. This backyard venture put him on the road to becoming Heinz 57.

In 1888 a doctor in Atlanta stood working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rushed over, squirted carbonated water into a glass containing a sample of syrup, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hires was served a drink by a farmer's wife. Its ingredients were sassafras, teaberries, and sweet fern, all gathered locally. Hires smacked his lips. Returning home he experimented with herbs, roots and bark. Thus was Hires' Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bill of goods from a wheelbarrow. Adam Gimbel, founder of the stores which bear his name, started with a pack on his back. Timothy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten cent stores is too well known to call for repetition. The great Crane Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of to-day had very humble beginnings, many of them within the life of the present generation. Opportunities are just as great to-day. "What's going to alter our lives is probably happening this minute in a backyard workshop, where some crank is thinking by himself," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea. They are beginning in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in the United States selling many different products told about four new products, all launched since January, 1930, and now selling widely. David was not afraid of Goliath, and observant youth with an idea or capable of assimilating one, with vision, enterprise and daring can just as successfully win out against the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in *Forbes* Magazine, from which much of the above is taken, says: "Ten years from now we will be reading more success stories gathered from the kitchens and cellars of 1935." No one who has a work-bench or a stove and a dollar—and an idea—he says, need be discouraged.

Strange Service

700 Deaf Mutes Worship In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 deaf and dumb persons from 14 nations pray and sing without a sound being heard. They were athletes attending the fourth international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and missionaries mounted the lofty pulpit and voicelessly acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar

Lord Londonderry, British Secretary of Air, has just celebrated his 67th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes.

It stands on his estate at Mount Stewart, Newtownards, Northern Ireland, where there is already an airport with a landing field of 50 acres.

Would Solve Problem

Shipment Of Eggs From England Made As Experiment

A few dozen English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane, and a railway journey of 500 miles from Brisbane to Sydney. The rest reached Rio Grande do Sul, Brazil, after travelling more than 6,000 miles from London by airplane and Graf Zeppelin. Now Lord Grey, the promoter of the experiment, is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. If the eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

The deep-sea fish, Chlamodion Nigra, famous for its voracity, sometimes manages to swallow a fish larger than itself.

More common colds are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going. 2113

For So-Called Luxuries

Bureau Of Statistics Has Issued Some Interesting Figures

What are luxuries? The Dominion Bureau of Statistics started to compile figures on the luxuries produced and consumed in Canada in a year, and was confronted with the difficulty that one man's luxury is another man's ordinary, every-day comfort. This is true of food, furniture, clothes and so on. Even tobacco is claimed by some to be a necessity. So the bureau finally decided to list everything as a luxury which is actually above the line of necessities. It included, therefore, such things as carpets, silverware, jams and cooked meats, and so, naturally, it did not present its conclusions as a hard-and-fast statement of luxury consumption in Canada, but rather "an attempt to throw some light on the production and consumption in Canada of goods which are more or less in the nature of luxuries." It found that the factory value of these in 1933 was \$263,608,185, or 12.6 per cent. of the total value of production in Canadian manufacturing industries. The retail values would, of course, be much higher.

The bureau also obtained Canadian consumption figures by subtracting exports from the figures for imports and production. It found that in 1933 the so-called luxuries were consumed to a factory value of \$268,342,910.

Some of the individual items are rather interesting. Canada gets candy to the extent of nearly \$17,300,000 per year; ice cream to the extent of more than \$7,300,000; other confectionery, including chewing gum, over \$6,000,000. Pies, cakes and pastry account for more than \$10,500,000; beverages (not including tea, coffee, cocoa, etc.), nearly \$21,000,000; silk hosiery (which the bureau says is not often considered a luxury nowadays), nearly \$8,400,000; toilet preparations, over \$5,000,000. These are all factory values.

The surprising item in the list is that for tobacco, as follows:

	1931	1933
Cigars	\$ 6,016,138	\$ 4,765,393
Cigarettes	36,132,977	34,912,141
Other	32,842,202	31,596,679

\$74,991,347 \$71,274,213

These again are factory values. For passenger automobiles, bicycles and boats, the people of the Dominion paid the manufacturers less than half what they did for tobacco in both these years: \$28,254,984 in 1932, and \$24,518,970 in 1933.—Toronto Daily Star.

Favors Stiff Sentences

Severity For Prisoners Demanded By German Minister Of Justice

"Severity" for prisoners as a Nazi tenet was demanded by Franz Guertner, minister of justice, at the opening of the 11th quinquennial penal penitentiary congress in Berlin.

"If criminal law is to represent atonement for wrong done the community," he told the 400 delegates from 50 nations, "and hence defend and protect the national community from evil-doers, the logical result is severity in the treatment of prisoners so the punishment may be appreciable to the evil."

Guertner also announced that the Nazi reich has definitely rejected the ancient legal principle: "Nulla poena sine lege" (no punishment unless a law is infringed). Instead, he said, it has substituted the maxim: "Nulla crimen sine poena," under which, punishment is meted out regardless of the incompleteness of a law.

American Boy Divers

Crude Combination Of Many Articles Enables Boys To Submerge

Three Maine youths wanted to see what the bottom of Kennebec River in Richmond, Me., looked like.

So the boys, Paul R. Dyer, Stanley Griffin and Robert Cate, constructed diving apparatus from a five-gallon gasoline can, two automobile tire pumps, a small corrugated tin and some cement.

Successful in their first attempts, they plan to explore greater depths.

Anxious To Know

A very nice old lady had a few words to say to her granddaughter. "My dear," said the old lady, "I wish you would do something for me. I wish you would promise me never to use two words. One is swell and the other is lousy. Would you promise me that?"

"Why sure, Granny," said the girl. "What are the words?"

Leprosy reached the United States from both Europe and Africa.

The oldest fruit known to mankind is the olive.

Celebrating Anniversary

Violin Industry Started In German Town 230 Years Ago

Mittenwald, Germany, a village in the mountains of Bavaria is now celebrating the 230th anniversary of its violin industry, begun in the 17th century by Mathias Klotz.

Throughout the summer the town folk presented a play, "The Song of the Stars," telling the story of Klotz and his wanderings over Italy, where he learned instrument making.

The play will be staged again this winter at a nearby town as part of the entertainment for the winter Olympics. The story of Mathias Klotz is a romantic one. When he was a boy of 10 his peasant family sent him to Italy to study under famous violin makers there. Twenty years later he returned to Mittenwald, opening his own workshop. Apprentices flocked to him and soon he established the fame of the town for fine instruments, a reputation Mittenwald retains to-day.

After making a number of instruments, Klotz's craftsmen had to go out into the world themselves to sell them. Strapping their violins on their backs they wandered through nearby countries, giving demonstrations and making sales in castles and great monasteries.

Correspondence Courses

Extending Education To Those Out Of Reach Of Schools

Nine years ago the Ontario department of education started correspondence courses for persons out of reach of school either for the whole school year or part of the summer months. The courses were intended also for those physically unable to attend school and for whom no provision was made for education.

During the last school year the enrollment was 2,800 of whom 50 were physically unable to attend school. The courses are free and the department pays all expenses. Average cost of educating a pupil for a year in this manner is from \$12 to \$15.

FASHION FANCIES

ATTRACTIVE HOME ENSEMBLE THAT HELPS TO MAKE KITCHEN CHORES SO EASY

By Ellen Worth

Every woman knows that she can't have too many home ensembles that will tub and tub and always come up smiling.

The dress is suitable for the house, garden, porch, marketing, etc. And incidentally, it's decidedly slimming to the heavier build.

The dress is blue and white dimity. The apron is white dimity which is also used for the apron. And isn't the one-piece apron attractive? It has suspender straps and it won't slip off the shoulders. Style No. 910 includes the dress and the apron in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46-inches bust. Size 16 requires 3 3/4 yards of 38-inch material for dress with 1 1/2 yards of 35-inch material for apron and dress collar.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Marking The Ballot

Strange As It May Seem, Many Voters Miff The Job

Placing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will miff the job.

In the 1930 contest 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have only to make the crosses themselves. Yet in 1930 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens and deputy returning officers throw out their ballots. On occasion, however, judges frequently have ruled such ballots valid. The Election Act says the cross must be made with a black pencil.

Many persons start to mark their X opposite the wrong name, score it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new one.

Voters sometimes ask why all this fuss about markings when the voter's choice is plainly indicated? The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '90's and earlier when the population was small, party workers knew which voters were Conservative, which Liberal and those "on the fence." Of the undecided variety some would sell their votes and the temptation of workers in a close race was strong.

But unless the voter buyer could be sure those he bought went to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result has been the regulations to prevent distasteful marks.

Election workers claim there is very little direct bribery now. Ridings are so populous and party affiliations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

Gift Was Acceptable

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyalists in the Irish Free State have given King George is declared to be not only nationally appropriate but most acceptable to His Majesty. It is a beautiful antique silver potato ring.

These rings, which measure from a foot in diameter, were in former times put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets, to keep them from rolling about. Reminiscent of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold at auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

Scrambled Eggs

Motor Accident Scatters Truckload Of Eggs Over Highway

Marion Snyder, of Harlan, Ind., knows what 100,000 scrambled eggs look like.

Driving a truck over Pocono Mountain near Mt. Carmel, Pa., Snyder was forced to turn the machine sharply to avoid hitting a train. His cargo of 109,800 eggs was scattered over the highway for some distance. Practically all of the eggs were broken.

Are Carefully Trained

Pigeons are trained as carefully for racing as a horse and usually when a pigeon becomes lost it is because it was in poor condition to start the race. The owners start training their birds at the age of two months. The pigeon reaches the peak of his racing between the ages of two and four years.

Rainbows are not semi-circles, but complete circles. If we were high enough in the air, we could see the entire circle.

It has been estimated that approximately 12 pounds of air is required to burn one pound of coal.

You can tell by his smile

Things are looking up... times have improved and he's again "rolling his own" with Ogden's Fine Cut. Why not "get back to Ogden's" yourself and again give yourself the pleasure Ogden's alone can give. Use the best paper, too... "Vogue" or "Chanticleer".

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew around the world in eight days, 15 hours, and 15 minutes, in 1931.

In 1933, he made a solo round-the-world flight, in seven days, 18 hours, and 49 1/2 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged suit" of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mae."

Odd Trick Of Nature

Sailor Relates Story Of Three-Yent Bath In 33 Fathoms

Nelson Lash was in the crew of the scallop, Virginia, three years ago when she was rammed and sunk off Georges Banks. With his clothes in a forecastle locker was a pocket handkerchief, his initial embroidered in a corner.

Now Lash has his handkerchief again, for he's in the crew of the Louis A. Thebaud, and in her scallop drag the crew found a handkerchief—with Lash's initials in the corner, in almost perfect condition after a three-year bath in 33 fathoms!

Only One Limit

Ten years ago the late Will Rogers was in a plane which had left Los Angeles for Kansas City. The ship hit an air-pocket and dropped 200 feet. "H-b-how far," asked a frightened passenger, "can one of these planes drop?"

"Well," Rogers informed, "the ground's the limit, boys!"

Mammoth cave, Ky., has been equipped with 12 floodlights and 16 smaller projectors to illuminate its interior.

MINARD'S

"KING OF PAIN"

LINIMENT

MISS ALADDIN

—By—
Christine Whitting Farmer
Author of
"One Wide River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, who is care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he has, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been injured to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Jack Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

Now Go On With The Story

CHAPTER XIV.—Continued

"She was a courageous woman, my mother, but I have sometimes wondered what was in her heart as she set me on my feet and no end toward that door, unarmed. Did she expect to confront a band of roving savages? What met her eyes was a single brave, and a boy of, possibly, seven years old. No doubt the Indian looked sinister enough. Only the week before a woman not many miles away had been scalped and mutilated. The horror of that story was still upon her; yet she did what may have been the only thing that protected herself and me. My mother smiled! It was, I imagine, a smile born out of terror; but to that grim-visaged Indian it was a gesture of friendliness. Who knows but there had been more such gestures, one page of our history would have been less tragic. And then, although her hands were so tightly clenched that (she found later) the nails had pierced her flesh, she looked straight up at him and said two words—words which sounded strange to her own ears in such a moment. Perhaps you have guessed them, for what my wonderful little mother said was: 'Merry Christmas!'"

Miss Columbine paused, and there was silence until Aurora Tubbs exclaimed: "But you can't tell us that that wild Indian knew what she said, Miss Columbine! It's not believable."

The old lady seemed to be looking at something far away.

"Not the words," she answered, "but perhaps he understood the."

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother, she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's
Vegetable Compound

smile; and she spoke gently. He came into the room, followed by his boy, and stood, arms folded, looking down at that small, gay tree and that happy little girl who knew no fear. For a moment I was too absorbed to note the callers; then, glancing up suddenly, I laughed with pleasure. Here was another child! I held my doll aloft so that the Indian boy could see it. "Look!" I cried joyously. "My new baby! See!"

"The boy reached out and took it from me, his white teeth gleaming in a quick smile. The man grunted something unintelligible and moved nearer the tree. He seemed, my mother told me, both puzzled and admiring, like a big child wondering what it was all about. He touched a yellow butterfly made from a scrap of paper; said something more, letting his glance rove slowly about the room. Her heart quickened as his eyes rested on the rifle; then subsided when he made no move to touch it. The boy, still admiring my homemade doll, said something rapidly and took from his neck a string of beads, holding them out to me. It was, my mother understood, meant as an exchange for my clothespin baby, and fearing trouble should I rebel, she said: "See darling, he has brought you a Christmas gift! Let him keep your dolly. I have another exactly like it for you; and this poor boy has no lovely tree, perhaps no mother. Tell him to keep it."

"My lip trembled; but she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently I was desirous of doing something for the other Indian, for I lifted the paper butterfly from his branch and held it out to him, saying: "It's your Kismus gi, man! Merry Kismus!"

A breath of pleasure swept through her audience as Cousin Columbine ceased speaking; then she continued: "I seem to remember the Indian stooping to take my offering. I know he smiled, though that is something my mother never corroborated. He grunted a word or two, intended, she was sure, as thanks; gave one more curious look at the small tree; and then they left us, those strange, strange Christmas guests, mounting their ponies and riding into the forest, destined, my father used to say, by a smile of welcome."

"And did you ever see them again?" questioned Eve Adam, her low voice very gentle.

"Never again. What they came for—where they were going, we never knew. And only a half hour later there sounded close to that well-barred door, the clear, sweet note of a merry Christmas. Until they did my valiant mother give way to tears."

Said Matthew Adam, gravely: "That is the nicest Christmas story I ever heard, Miss Columbine."

"And now," suggested his mother, going to the melodeon, "let's end our evening by singing some of the good old carols."

Later that night when the guests had departed and the Nelson mansion stood in the moonlight, Nancy went to her tower and gazed for a moment at the snowy Peak. It had been a long, exciting day, and suddenly conscious of being tired, the girl opened the window and slipped gratefully into her big black walnut bed.

The moon was very bright and she saw quite clearly Aurora's calendar and the military figure of General Grant, looking down upon her from the wall. She saw too, that her chiffon gown lay where she had tossed it carelessly, in close proximity with the patchwork quilt, and Nancy smiled to herself, there in the moonlight.

"Chiffon and calico!" she murmured drowsily. "I guess they aren't so far apart as I used to think." Then her eyes lifted to the steel engraving and she laughed a little.

"Good-night, General Grant," she said politely. "I was pretty insulting to you at first, but I believe I'm getting to rather like you. Perhaps it's the uniform. The way that soldier Adam readily agreed to supply the sign; and one day in January Mark brought it in from the ranch."

"Dad's been so temperamental you'd think he was painting a picture for the Art Museum," he declared. "Honestly, Nancy, since you wished this job on him that morning neglected his cooking shamefully; but the sign's a corker."

"I'll say it is!" Nancy spoke almost with awe. "I never expected

anything so—so professional. And those Aladdin lamps at either end are stunning. Your father must have spent a lot of time on the sign, Mark. Can you put it up if you go over to the schoolhouse now?"

"I came prepared, lady; and there's a box of books at the station which our sweet young Denver cousin collected for you. Matt'll be down to finish the shelves this afternoon, and—Hi there, Aurora Tubbs! Come see this sign."

Aurora emerged from the kitchen, and stood, arms akimbo, admiring eyes on John Adam's handiwork.

"If it don't look exactly like a boughten one!" she exclaimed. "But if those fancy things is meant for lamps, Mark Adam, they must be terrible old-fashioned and hard to fill. Your father's a regular artist, ain't he? I wonder would he letter me some callin' cards. I've hankered for some of the silly things ever since Victor's cousin Ella had some writ by a one-armed soldier who was doin' 'em in a doorway in Denver."

"Sure he'll do 'em for you," Mark promised recklessly. "Hello, Miss Columbine. Just look at Father Adam's masterpiece!"

Cousin Columbine came briskly down the steps.

"It's a beauty, isn't it?" said Nancy, her face glowing.

"It surely is. Are you going to put it up to-day, Mark?"

"Soon as I twiddle a ladder out of your barn. You'd have to come along, Nancy, and boss the job."

Those days were full of interest, for Aunt Louise and the girls at school had responded generously to Nancy's plea for books. Mother and Dad had doubled the number; Phil had collected twenty more; and Aunt Judy, immediately on hearing about the scheme, had sent a check for the purchase of new ones.

No check had ever looked so big to Nancy Nelson, or been so welcome; and one day Mark drove her to the Springs to purchase this important addition to her library. He also improved the occasion considerably by taking her to lunch at the Antlers Coffee Room, and to a movie.

It was dark when they reached Pine Ridge again, to find Aurora deploring that their mangled bodies were doubtless at the bottom of some ravine. In fact, as Mark said later, she looked a trifle disappointed when they arrived safe and sound in her shining kitchen!

"Didn't I say you were demented, Aurora Tubbs?" observed Miss Columbine triumphantly.

Despite the time, her face looked noticeably relieved; and Nancy exclaimed: "Oh, dear! we only went to a movie. I didn't dream that you'd be worried, Cousin Columbine."

"No more I should have," snapped the old lady, "if Aurora hadn't harped on the idea. Mark Adam, you'd better call up your mother. No doubt she's wondering where you are."

"And me, worryin' myself sick for nothin'," grumbled Aurora. "A movie! Not even a flat tire; and I wonder in if your necks was broken."

That day seemed long ago to Nancy when on an afternoon in February she went down the unused street, turned at the filling station and ascended a low hill on which stood the abandoned schoolhouse, "erected in 1902," Cousin Columbine had told her, to replace the one destroyed by fire. It was a small, frame building with no pretense at beauty; but the girl paused for a moment to admire John Adam's handiwork before she unlocked the door.

The air outside was warmer than within, and Nancy opened a window before proceeding with what Jack called "janitorial duties." The air-tight stove must be lighted, and the whole place dusted before the first arrival should appear. These tasks completed, Nancy sat down behind the kitchen table which served as librarian's desk, and looked about with satisfaction.

Perhaps the girl didn't wholly realize that this satisfaction which was like nothing she had ever experienced before was the result of having achieved something—something really worthwhile. She had had help, of course; but the idea had been her own, and Nancy had put it through triumphantly.

"I couldn't have done it without the others," she told herself, "but at least, they wouldn't have done it without me. It had never occurred to them; and Cousin Columbine was doubtful that the plan would work."

Yet, being no wet-blanket, the old lady had done her bit by arranging for the use of the schoolhouse, and writing to the Oklahoma family who came to Pine Ridge summers. This proved an inspiration, for they responded with a box of books and a beautiful New York rug in grey and scarlet which covered the centre of the floor, giving the place a homey look.

"And some day," mused Nancy, as if her stay in Pine Ridge was to be indefinite, "we'll put in a fireplace. That's all we need to make it wonderful."

(To Be Continued)

New Method Of Rust-Proofing

Shows No Rust After 1,000 Hours Of Salt Spraying

An entirely new method of rust-proofing, which, for the first time in the history of electro-chemistry, utilizes alternating current in the process, has been perfected by the Ford Motor Co., and is now being used on its entire production of hard and tail lamps, at the Ford lamp plant at Flat Rock, Mich.—the famous "factory in a meadow."

The new process was adopted because it requires less floor space than other rustproofing methods, provides a surface all ready for painting as the article comes from the rustproofing machine, and withstands at least 300 hours of salt spray test without deterioration. Tests of 1,000 hours under salt spray have shown no rust, Ford chemists say. This is the equivalent of many years of ordinary use.

The process, which was first developed outside the Ford organization, did not work well when Ford made the first commercial installation. The treated articles developed in part an "alligator" surface which was not fit for painting. It was finally decided the trouble arose through the lamp shells being too clean when they went into the zinc phosphate rustproofing bath. So instead of the shells going through a washing machine first, they are now made "dirty" by an operator who wipes over with an oily cloth the surface to be painted. The film of oil provides enough protection from the acid in the rustproofing bath for the deposition of zinc to begin before the acid has etched the steel.

The effect of the alternating electric current is to permit the articles to take up the zinc without interference from hydrogen bubbles which form on the surface of the article to be rustproofed in the absence of the electricity. The process is not electro-plating, however. In electro-plating, the article to be plated is the cathode of the electrical circuit, whereas in this new process the article is alternately cathode and anode, alternating 60 times a second.

World's Worst Volcano

Exudes Salts Of Ammonia Fromes That Suffocate Every Living Thing

Koh-i-Tafatan, known as the world's worst mountain, has again been in eruption. It is on the British-Persian boundary in Baluchistan, and for nearly 100 miles around no man, beast or reptile can survive. It is the only mountain in the world which emits lava from its crater and exudes dense volumes of salt of ammonia. It suffocates every living thing and burns up the plants. It's activity was heralded by flights of frightened birds escaping from the dreadful fumes which suffocate and blind. No troops can be maintained near Koh-i-Tafatan, although it is in the frontier. "Mound of Hellfire" the Persians call it.

How Club Was Named

An organization of veteran New York printers is oddly named The Judgment Day Club. On the night the New York World suspended publication, a composing room employee remarked, "This is Judgment Day—it's the end of the World." And that's how the fraternity of old New York World printers got its name.

"Vot I say is, the man should have all the say in the home; that's vot I say."

"I say the same—only I don't say it."

A WORLD OF FLAVOR

Tracing Migration Stories

Skeletons Help Archaeologist Working On Lonely Island In North

The life story of successive waves of civilization which crossed the island stepping stones between Asia and America is being traced on lonely St. Lawrence Island in the Bering sea.

The story—told in human skeletons, animal bones and broken utensils—is being preserved in paraffin. The work was described in a letter from the expedition headed by the noted Alaskan archaeologist, Dr. Otto Geist.

Aided by 39 or 40 Eskimo laborers from nearby Savoonga, the scientist's are excavating skeletal remains and carefully brushing them with melted paraffin to preserve them for shipping to research laboratories.

Having removed much of the overburden and remains of comparatively recent eras in the eight past annual expeditions, the party this summer uncovered a layer of ancient culture antedating the discovery of the island by Captain Commander Vitus Bering on St. Lawrence's Day, Aug. 21 (10th, old style) 1728.

The immigrants crossed over in seven successive waves, Dr. Geist believes, between Asia and America. Some earlier civilizations were of a higher culture than some of the later ones, he has determined.

Webster Air Trophy

Kingston Flyer Wins At Competition Held In Montreal

With a skillful display of airmanship, Pilot Gordon R. McGregor, president of the Kingston, Ont., Flying Club, captured the Webster memorial trophy and the title of Canada's foremost amateur aviator at Cartierville airport at Montreal. Competition for the Webster trophy, awarded by the family of John C. Webster, of Shediac, N.B., killed in a crash here several years ago, was held under the auspices of the Canadian Flying Clubs Association with the co-operation of the Montreal Light Aeroplane Club. McGregor eliminated 11 other airmen including two westerners, to gain the award.

Wes Hodgson, 18-year-old Regina newsboy, who was competing in a secondhand plane purchased from his savings as a newsboy, took every test but failed to gain enough points and finished last in the competition. "Well, I may have better luck next year," he said after hearing the results. Fred Lasby, of the Moose Jaw Flying Club, also competed.

Speed Of The Times

In 1920 it required 57 hours of human labor to grow an acre of wheat yielding twenty bushels, while to-day, we are told by T. A. Russell, of Toronto, it requires approximately eight hours. This is only keeping up with the speed of the times. We are travelling to-day more than seven times as fast as our grandparents did a hundred years ago.

The first university chair in the world devoted to the study of spiritism is to be established shortly at Lund University in Stockholm, Sweden.

In the South Sea Islands, frigate birds are trained to carry messages like homing pigeons.

Little Helps For This Week

God is not unrighteous to forget your work and labor of love which ye have showed toward His name, in that ye have ministered to the saints, and do minister. Hebrews 6:10.

Wherever in the world I am, in whatsoever estate, I have a fellowship with hearts To keep and cultivate, And a word of lowly love to do For the Lord on whom I wait.

We do not always perceive that the commonest things, the writing of a note, the making of something intended as an offering of affection, our necessary intercourse with characters that have no congeniality with our own, may be made the performance of a most blessed and sacred work, even the carrying out, after our feeble measure, the design of God for the increase of happiness.

Definite work is not always that which is cut and squared for us, but that which comes as a claim upon the conscience.

Tackles Big Job

Mayor Of New York Aims To Make City Noiseless

New York City, with all its bustle, bustle and commotion, free of unnecessary noise, is the job tackled by Mayor F. H. LaGuardia. Shrieking autos, blaring radios, rumbling trucks and noisy garages—anything that makes a noise—are to be curbed. Even police patrol cars and fire engines must not use their sirens unnecessarily. Heading the mayor's planned program is a month of "noiseless nights." He thinks everyone should be able to enjoy sleep, uninterrupted. That campaign will operate through October. Then, during November, will come a month of hopes for "noiseless days."

The mayor thinks that by the end of that month he'll have everybody enjoying 24 hours of quiet each day. The mayor has created the job of "NAC"—Noise Abatement Commissioner—and given the portfolio to Major Henry Curran. Major Curran now is in Europe studying noise abatement systems.

Rabbits Cause Floods

Dykes Burrowed Nearly Hollow, Reason For Their Collapse

Rabbits have been responsible for serious floods in the Swiss canton of Valais. Intense heat throughout Switzerland has melted an unprecedented quantity of snow, which has swollen the headwaters of the Rhone into food tides.

This rare contingency is provided against by dykes built on the banks of the rivers. These, however, collapsed due to the fact that they had been burrowed nearly hollow by a vast colony of rabbits.

Grows Billions Of Flowers

The number of flowers used in Grasse, France, in the manufacture of perfumes staggers the imagination. In a single year ten billion jasmine blooms, about forty million pounds of roses and some fifty million pounds of orange blossoms are harvested for the great perfumers. In addition, Grasse sends out flowers by special trains to nearly every part of Europe.

Game Regulations On Migratory Birds As Applied To Alberta

Closed Seasons, Bag Limits, Guns and Appliances Described

The National Parks Service of the Department of Interior, Ottawa, has just issued the Regulations regarding Migratory Birds for the current year. A summary of the regulations as they apply to Alberta follows:

OPEN SEASONS

—Both Dates Inclusive—
Ducks, Geese, Coots, Rails, Wilson's or Jack-Snipe.

In that part of Alberta lying north of the Clearwater and Athabasca Rivers: from noon on September 1 to and including November 14.

In that part of Alberta lying south of the Clearwater and Athabasca Rivers: from noon on September 15 to and including November 14.

CLOSED SEASONS

There is a closed season throughout the year on Elder Ducks, Wood Ducks, Swans, Grebes, Willets, Godwits, Upland Plover, Black-bellied and Golden Plover, Greater and Lesser Yellowlegs, Avocets, Dowitchers, Snails, Oystercatchers, Phalaropes, Gulls, Surf-birds, Turnstones and all the shore birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds:

Auks, Auklets, Bitterns, Fulmars, Gannets, Grebes, Gullinets, Gulls, Herons, Jaegers, Loons, Murre, Petrels, Puffins, Shearwaters, and Terns; and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadowlarks, Nighthawks or Bull-bats, Nuthatches, Orioles, Robins, Shrikes, Swallows, Swifts, Tanagers, Titmice, Thrushes, Vireos, Warblers, Waxwings, Whip-poor-wills, Woodpeckers and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, capture, injure take or molest any migratory game birds during the closed season; and no person shall sell, expose for sale, offer for sale, buy, trade or traffic in any migratory game bird at any time.

The taking of the nests or eggs of

PERSONNEL OF WHEAT BOARD

The appointments of the Canadian Wheat Board were announced on Wednesday. John I. McFarland is the chairman, D. L. Smith, vice-chairman, and the third member is H. C. Grant. Mr. McFarland, well known as the general manager of the Canadian Wheat Pool since 1930 and the man who conducted the government wheat stabilization operations, D. L. Smith was formerly manager for the Canadian Wheat Pool, latterly the Pool's representative in Europe, and for the past year he has been operating a grain importing business of his own in London, England. H. C. Grant is professor of economics in the University of Manitoba, with a wide knowledge of farming conditions in Western Canada.

The board held its first meeting on Wednesday and announced that futures trading would soon be resumed on the Winnipeg exchange. The minimum price will shortly be announced. The exchange will be permitted to operate under certain regulations.

An advisory board of seven members has been appointed to act along with the wheat board. Low Hutchinson of Duhamel, director of Alberta Wheat Pool, is a member of this advisory board.

migratory game, migratory insectivorous or migratory non-game birds is prohibited.

The killing, hunting, capturing, taking or molesting of migratory insectivorous and migratory non-game birds, their nests or eggs is prohibited.

The possession of migratory game birds killed during the open season is allowed in Alberta until March 31 following open season.

BAG LIMITS

Ducks, 15 in the aggregate of all kinds in any day during September; and in any day during the balance of the open season, Ducks 25; Geese 10 in any day; Coots and Rails 25; Wilson's or Jack-Snipe 25; and not more than 100 Ducks or more than 25 Geese in one season.

Called to a caucus commencing in Calgary at 10 o'clock Wednesday morning, Social Credit members of the Legislature along with defeated candidates will decide immediate activity of the party, Wm. Aberhart announced during a Sunday broadcast.

Mr. Aberhart said he had requested by Hon. W. L. Walsh, lieutenant governor, to attend an interview at Edmonton and might be leaving for northern city later in the week.

Should it be the desire of the caucus, the leader of the victorious party said, he would be willing to accept the premiership of Alberta, fully realizing the tremendous responsibility attached.

Subsequent to his broadcast, he said that nothing would be done regarding the premiership of filling the cabinet posts until the situation was fully reviewed by members of the new government.

Urging that nominations in the federal field be delayed, Mr. Aberhart, in announcing the Wednesday caucus, indicated that action in that direction would probably be determined when members meet.

WHEAT CARRYOVER IN THE UNITED STATES

United States crop year ended on June 30th and at that time the wheat carryover was placed at 149,399,000 bushels, the lowest since 1928. The 1934 carryover was 286,201,000 bushels, and the all-time high was 393 million in 1933. Of the total carryover this year approximately 42 million bushels was estimated to be on farms.

Local News

Word has been received here that Mr. Andy Carlson, owner of the old Lensgraf farm, had the misfortune to get his arm broken in five places while in a car accident which occurred in the vicinity of Vermilion.

Born—To Mr. and Mrs. Chas Bennett on Saturday, August 24th, in the Cereal Hospital, a daughter.

The Misses Hazel and Ella Broston who have been at Clear Water Lake, Summit Resort, where they spent the past four months, returned to their home here on Friday.

Mr. and Mrs. Chapman and daughter Miss Lorna, also Mrs. Chapman's niece, Miss Helen Dawson with girl friend who been visiting here for some time, left by motor Sunday for Edmonton and Wildwood.

Miss Eileen Bjork, of Atlee, is visiting with Miss Joan Bayley.

Mr. Elford returned last week to move his household effects to Taber, Alta., where he has accepted a position as teacher in the High School in that town.

Mrs. N. F. Marcy left Sunday for Bowden and Innisfail where she will visit with her daughters Miss Irene and Mrs. Dick Nicholson, she will also visit with her brother Mr. Leo Foster.

Little Irene Vanduzee is visiting with her grandparents Mr. and Mrs. Peyton for two weeks.

Mr. J. L. Wassey delivered the first load of 1935 wheat to the Pool elevator on Saturday. The wheat graded No. 1 and weighed 63 lbs. Mr. Wassey has been the first in the Chinook district for many years to haul the first load of new wheat to the elevator.

Eldon Rideout visited this load at Hanna with Dale Smith.

Mrs. Cooley and family who have been visiting for the past month with Mrs. Cooley's parents at Carstairs, returned Tuesday.

Wedding

DAVIS—TOBIN

Mr. and Mrs. Harry Tobin, of Youngstown, announce the marriage of their eldest daughter, Anna Margaret, R. N., of San Francisco, to Mr. Philip E. Davis, manager of the American Trust Co. in San Francisco. The ceremony which took place July 27th, was performed by Rev. Father O'Mara in the old mission church, San Rafael, California.

At the last report Social Credit Candidates are elected in 50 seats, Liberals elected in 4 Seats and Conservatives held 2 seats.

Social Credit League candidates are still leading in 6 doubtful Seats and Liberals in one.

Country New

Mr. L. Setterington who was taken suddenly ill last week and was taken to the cereal hospital Saturday is getting along as well as can be expected

The Prairie Rock Club met last Thursday at the home of Mrs. Smith. A very enjoyable time was spent. Mrs. Smith also entertained the children of the district.

Mrs. Johnston and two sons, of Winnipeg, arrived here Tuesday morning, are the guests of Mr. and Miss Warren.

Licenses for Combines and threshing machines can be had at the Municipal office.

Lower Grain Storage Rates

Something new in the history of the grain business in Western Canada developed this week when the Alberta Pool Elevators announced its intention of cutting the storage rates for grain carried in its elevators by approximately one-third effective from August 31, 1935.

Pool Elevators will charge 145c a bushel a day for grain in store instead of 1.30c a bushel a day—the rate which has prevailed for many years. The new rate will apply for grain stored in its over 435 country houses as well as in its 4 terminals at the Pacific coast.

Alberta Pool Elevators is a co-operative organization owned and operated by Alberta farmers. In that position it considers it a privilege to be instrumental in reducing costs in some measure to the grain growers in a year when crops have suffered severely from drought, hail and frost.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, 100 Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for each line. Reading notices, 10c per count line. Local advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

Here and There

Five percheron stallions, smartly groomed cavalry chargers of the mounted police, racing and racing horses and champions trained jumping and for the hunting field mingle at the village of Montebello, P.Q., on the north shore of the Ottawa, for the annual Eglonry Club Horse Show this summer during August 15-18, Thursday to Sunday. A musical ride will be put on by the Royal Canadian Mounted Police. The event is under the patronage of His Excellency the Governor-General and Canadian and American society folks are expected in large numbers.

Enjoying a short stay at the Danforth Hotel, the new Brunswick, opened for the summer season at the end of June, and is now the centre of much holiday activity. Their Excellencies the Governor-General and Lady Desbrough were among the guests and the famous Kaituma Cove bathing beach is again as in former years very popular with the children and the younger set.

Addressing a gathering of the Rotary Club of Victoria at the Empress Hotel, recently, Premier Joseph A. Lyons of Australia, pointed to the British Empire as a great force for peace and urged Canada to cultivate a more favorable attitude with his own country. Last year, he said, Australia brought from Canada \$18,600,000 worth of goods, while Canada brought from Australia only \$5,000,000 worth.

The Algonquin Hotel, St. Andrews-by-the-Sea, New Brunswick, opened for the summer season at the end of June, and is now the centre of much holiday activity. Their Excellencies the Governor-General and Lady Desbrough were among the guests and the famous Kaituma Cove bathing beach is again as in former years very popular with the children and the younger set.

With the increasing popularity of vacation trips on the Great Lakes, the Canadian Pacific has expanded its Great Lakes steamship service to include calls at Port Arthur on westbound voyages as well as eastbound. These ships have been outfitted with deck sports, including quads, shuffleboard and deck golf. Dances are given on the ships during the evening hours. The schedule makes it possible to take an enjoyable week-end trip from St. John to Port Arthur with overnight stops at both ends, Port McNicoll and Port Wilmot.

The Macmillans are again this year attracting a large number of tourists from Canada and the United States. Across the Bay of Fundy there is a very pleasant steamer trip from Saint John to Digby where the Pines Hotel is located and from Boston to Yarmouth with its well known Lido Inn, there are regular sailings. Also the Cornwallis Inn at Kentville is the first-class centre for trips to the famous Brasenalia Country around Grand Pond.

August is the peak month at the Banff Springs Hotel when the "Banff 25-31" party will complete in the historic Prince of Wales Trophy and the Willingdon Cup. The course, a mile above sea-level and set in the midst of some of the most glorious scenery on the continent, is the locale of the play.
